17 June 2022

Unit Value Indices (UVI) of exported and imported goods

2021

Unit values of goods exported from January to December 2021 increased by 13.4% compared with the same period of previous year.

From January to December 2021, compared with the same period of previous year, unit values of goods imported increased by 7.3%.

From January to December 2021, when observing chapters of customs tariffs i.e. Combined nomenclature, the highest rise of unit value of goods exported of 80.6% was noticed under chapter "Works of art, collectors' pieces and antiques", while on the import side of goods, the largest increase of 47.0% was in chapter "Mineral fuels, mineral oils and products of their distillation, bituminous substances, mineral waxes".

METHODOLOGICAL NOTES

Unit value indices of exported and imported goods are aimed at analytical measuring the dynamics of unit values of export and import, and they are also used as a deflator in Gross Domestic Product calculation.

The data source for unit value index calculation are collective customs declarations on export and import of goods which are monthly transmitted to Statistical Office of Montenegro by Revenue and Customs Administration of Montenegro, and used for regular statistical survey in the foreign trade of Montenegro.

Indices of exported and imported prices are calculated as Unit Value Indices (UVI), i.e. changes indices of export and import values per quantity unit of products exported and imported, i.e. per kilogram as a standard and comparable quantity unit for all products.

Indices are calculated by Fisher formula, as an arithmetic average between Laspeyres and Paasche formulas, i.e.

Laspeyres index $= (\sum p_1 \cdot q_0 / \sum p_0 \cdot q_0) \cdot 100$,

Paasche index $= (\sum p_1 \cdot q_1 / \sum p_0 \cdot q_1) \cdot 100$ i

Fisher index $= \sqrt{\text{Laspeyres} \cdot \text{Paasche}}$

Where:

p0 unit value from previous period,

p1 unit value from current period,

q0 quantity from previous period and

q1 quantity from current period.

Relations of exchange are relations between export and import of unit values.

Processing excludes products with the value under 1 000 EUR, where is unit value of current year twice or higher in comparison with previous year and vice versa, where is the quantity of current year 10 times or higher in comparison with previous year and vice versa.

When using the data, state:

"Data source: Statistical Office - MONSTAT"

More data, as well as detailed methodological notes can be found in the section: [Foreign trade](#)
