- The percentage of children aged 5-17 years with functional difficulty in at least one domain is highest in the Southern region (14) and the lowest in the Central region (3).
The Montenegro Multiple Indicator Cluster Survey (MICS) was carried out in 2018 by the Statistical Office of Montenegro (MONSTAT) as a part of the global MICS programme. Technical support was provided by the United Nations Children’s Fund (UNICEF), UNICEF, the Government of Montenegro, and UNHCR provided financial support.

The objective of this snapshot is to disseminate selected findings from the 2018 Montenegro MICS related to Child Functioning. Data from this snapshot can be found in tables EQ.1.1, EQ.1.2, and EQ.1.4 in the Survey Findings Report.

Further statistical snapshots and the Survey Findings Report for this and other MICS surveys are available on mics.unicef.org/surveys.
