**Birth Registration Levels in Roma Settlements**

**Key Messages**

- The percentage of children aged under-five in Montenegro Roma Settlements who have been registered is 96, of which 4 percent are reported to have been registered with civil authorities but do not have a birth certificate.

- Almost all births of children aged 5-17 years have been registered (99 percent), of which 4 percent are reported to have been registered with civil authorities but do not have a birth certificate.

- Children aged under 5, living in the North (12 percent), whose mothers have no education, pre-primary or primary education (4 percent) and children living in households in the poorest quintile (8 percent) are most likely to be registered but be without a birth certificate.

- All children aged under five from the richest quintile are registered, compared with 94 percent of children from the poorest quintile. Two percent of registered children from the richest quintile do not have a birth certificate, compared to 8 percent of those from the poorest quintile.

- Without birth registration: 94%
- Registered but no birth certificate: 95%
- Has birth certificate: 93%

Note: The figures do not add up to 100 percent because of rounding.
The Montenegro Roma Settlements Multiple Indicator Cluster Survey (MICS) was carried out in 2018 by the Statistical Office of Montenegro (MONSTAT) as a part of the global MICS programme. Technical support was provided by the United Nations Children’s Fund (UNICEF), UNICEF, the Government of Montenegro, and UNHCR provided financial support.

The objective of this snapshot is to disseminate selected findings from the 2018 Montenegro Roma Settlements MICS related to Birth Registration. Data from this snapshot can be found in tables PR.1.1R and PR.1.1RB in the Survey Findings Report.

Further statistical snapshots and the Survey Findings Report for this and other MICS surveys are available on mics.unicef.org/surveys.
