Other products	188 677	44 694	143 983
Fresh fish	604 386	-	604 386
TOTAL	9 994 323	6 356 847	3 637 476

Average prices of selected producers' agricultural, forestry and fishing products, third of 2012

	Unit of measure	Average price, euro	
		purchase	sale
Wheat (for grain)	kg	0.49	0.47
Ray (for grain)	kg	0.50	0.51
Barley (for grain)	kg	0.61	0.59
Oats (for grain)	kg	0.76	0.55
Maize (for grain)	kg	0.48	0.46
Buckwheat	kg	1.15	1.20
Lettuce: all classes	kg	1.26	-
Spinach	kg	1.33	-
Cucumbers: all classes	kg	0.49	-
Tomatoes in the open	kg	0.72	-
Fresh peppers	kg	-	0.46
French beans: all classes	kg	1.27	-
Swiss chard	kg	0.87	-
Potatoes	kg	0.35	-
Water melons	kg	0.22	-
Dessert apples: all varieties	kg	0.73	-
Dessert pears: all varieties	kg	0.84	-
Peaches: all varieties	kg	1.10	0.80
Apricot	kg	1.33	-
Plums	kg	0.96	-
Raspberries	kg	0.88	-
Blackberry	kg	0.77	-
Young cattle (store)	kg	1.83	-
Heifers	kg	1.80	2.96
Cows	kg	1.39	2.38
Bullocks	kg	1.69	-
Calves	kg	2.80	2.87
Lambkin	kg	2.57	-
Row milk	l	0.32	0.38
Hens' eggs	p/st	0.13	0.09
Cream (milk skim)	kg	-	7.5
Cream cheese (white cheese in slices, etc.)	kg	-	2.49
Trout	kg	-	3.98

METHODOLOGICAL NOTES

Sources and methods of data collection

Monthly statistical survey collects data on the value, quantities and average producer prices of agricultural, forestry and fishery products. There are collected data on quantities and values of purchased products by individual products and enterprises. Report on purchase is submitted by enterprises and agricultural cooperatives dealing with purchase of agricultural products directly from individual products, with the aim of sale and/or fabrication of purchased products. Report is also submitted by business entities (purchase stations) which are part of trade, industrial and other enterprises, if they deal with purchase of agricultural products. In addition, there are collected data on sell of agricultural data from own production of agricultural enterprises and agricultural cooperatives and units, as well dealing with agricultural production and sale and they are within the non-agricultural enterprises.

Coverage

The purpose of survey is collection of data on average purchase and sale producer prices of agricultural, forestry and fishery products.

Criteria for coverage of legal entities are number of workers (from 2 and more employed workers).

We would like to point out that because of criteria for coverage data received do not present total purchase and sale in territory of Montenegro.

The questionnaire contains quantities, values and average prices.

Regarding its contents, the questionnaire has been harmonised with the Handbook for EU Agricultural Price Statistics, 2008.

Definitions

Quantities sold are deliveries of agricultural products to other enterprises because of fabrication and /or sale. Deliveries of processed agricultural products are only for those products received by fabrication of raw materials from own production, deliveries to own shops which deal with retail trade of agricultural products, direct retail trade delivery of agricultural products performed by producers of agricultural products outside of shops, deliveries of fatten livestock (it is presented quantity representing increase, i.e. the difference in the weight among purchased and sold livestock heads purchased from enterprises, cooperatives or individual producers with the aim of delivery).

There are no considered as delivered quantity processed products made of raw materials purchased by other enterprises and individual producers.

Value of sold agricultural products is value of delivered (sold) products from own production by selling producer prices. In the value of sold products there are included all costs related to preparation of products for delivery to the place of loading (sorting, packaging, transport to the place of loading). The value of delivery to own retail trade

shops is calculated by producers' selling prices (calculation prices, without trading margin and taxes).

Purchased quantities are those quantities of agricultural products overtaken during reporting month directly from individual producers. Purchased prices comprise all types of purchase, including products received from cooperatives for services performed, work and spent equipment, as well as for products deriving from exchange of products (common harvest, exchange of cereals for flour etc.). Cereals with moisture above allowed should be re-calculated in dry grain, and slaughtered livestock and poultry into live measure.

The value of the purchase is expressed in prices that enterprises pay purchased products to individual producers.

Bonuses that individual producers receive for delivered products are not included in the value of purchase.
