STATISTICS OF INTERNAL MIGRATION

Legal basis
Legal basis for conduction of Migration statistic is Law - on official statistics and official statistical system (Official Gazette of Montenegro 18/12) and The Annual Plan of official statistics which is carried out each year.

The Law on registers of permanent and temporary - residence ("Official Gazette of Montenegro", no. 13/08, 41/10 and 40/11) establishes and regulates the manner of keeping the register of permanent and register of temporary residence of Montenegrin citizens and foreigners, as well as a way to refill, use and protection of data. In purpose of its better implementation Ordinance on the form and manner of submission of the registration, - cancellation and change of residence and address was brought ("Official Gazette", no. 45/08 and 54/08).

Data are collected on the basis of the Agreement on cooperation in the field of statistics on internal and international migration, which was signed between the Statistical Office and Ministry of Interior.

METHODOLOGICAL BASIS

Aim and content of survey
The aim of the statistics on internal migration is to obtain the data needed for analysis of the mechanical movement of the population. These data are used in statistics for calculating the estimated number of population as well as for the calculation of net migration which show the change in population by municipalities in Montenegro.

Collected data are: date of registration of residence; sex; age; place of birth (birth municipality in Montenegro or any other country - code and name); level of education; occupation; marital status; residence to which the person registers (code and name of the - settlement and municipality); residence from which the person is cancelling (code and name of settlement and municipality).

Data sources
Data Source for Statistics on Internal migration is an administrative source. The Ministry of Interior is submitting to Monstat data from the registry of permanent and temporary residence register.

Coverage
The observation units are individual events of moving (– moving in and moving - out) within the borders of Montenegro.
Protection of individual data

Based on the Cooperation Agreement signed between the - Statistical Office and Ministry of Interior, data submitted to the Statistical Office do not contain a single feature that allows the identification of persons.

Definitions of basic features – indicators

Migration or moving of population is spatial movement of population from previous place of residence to other place.

Migrant is person who changed place of residence within borders of Montenegro.

Moved in person is person who registered place of residence in certain place in Montenegro and her/his previous place of residence was in some other place in Montenegro.

Move out person is person who cancelled residence from certain place in Montenegro with the intention to register it in some other place in Montenegro.

Migration population balance (net migration) is difference between number of immigrated and number of emigrated persons from certain areas or certain countries in some period of time. If number of immigrated is higher than number of emigrated persons we talk about positive migration balance, actually mechanical increase of number of population, and if there is more persons who moved out than immigrated, here it is about negative migration balance, i.e. mechanical decrease of number of population of given area or state.

The level of data dissemination

Data are presented at the municipal and country level.

Deadlines

Data are collected monthly, and processed annually. Deadlines for submission and publication of data are defined in the Annual Plan of official statistics.

STATISTICS OF INTERNATIONAL MIGRATION

Legal basis

Legal basis for conduction of Migration statistic is Law - on official statistics and official statistical system (Official Gazette of Montenegro 18/12) and The Annual Plan of official statistics which is carried out each year.
The Law on registers of permanent and temporary residence ("Official Gazette of Montenegro", no. 13/08, 41/10 and 40/11) establishes and regulates the manner of keeping the register of permanent and register of temporary residence of Montenegrin citizens and foreigners, as well as a way to refill, use and protection of data. In purpose of its better implementation Ordinance on the form and manner of submission of the registration, cancellation and change of residence and address was brought ("Official Gazette", no. 45/08 and 54/08).

The Law on foreigners ("Official Gazette of Montenegro", no. 82/08, 72/09, 32/11 and 53/11) regulates the conditions for entry, movement and residence of foreigners on the territory of Montenegro. With the aim of its full implementation the Ordinance on the manner of granting temporary residence and permanent residence and issuing travel and other documents to foreigners is brought ("Official Gazette of Montenegro", no. 58/09, 62/09 and 13/12), which prescribe the content and record keeping. Data are collected on the basis of the Agreement on cooperation in the field of statistics on internal and international migration, which was signed between the Statistical Office and Ministry of Interior.

**METHODOLOGICAL BASIS**

**Aim and content of survey**

Statistics on international migration produces data about the contingents of the population by citizenship and country of birth, on migration flows by citizenship, country of birth and country of previous / next residence.

These data are used for analysis of the mechanical movement of the population, as well as for calculating the estimated number of population.

Collected data are:

For foreign citizens who settled to Montenegro: the date when the person applied first time in Montenegro, the date of application in the reference year, the date by which the application applies, sex, age, country of birth, level of education, marital status, previous residence abroad, a new residence in Montenegro (settlement and municipality), the purpose of, i.e. the basis of residence (reason of immigration), type of approved residence (permanent or temporary), whether the person is applying for the first time in Montenegro.

For Montenegrin citizens who settled to Montenegro: date of application in the reference year, sex, age, birth municipality in Montenegro or another country, level of education, marital status, previous residence abroad, a new residence in Montenegro.
For Montenegrin citizens who have moved from Montenegro: check-out date, sex, age, birth municipality in Montenegro or another country, level of education, marital status, settlement and municipality from which the person is signing off, a new country of residence.

Data sources
Data Source for Statistics on Internal migration is an administrative source. The Ministry of Interior is submitting to Monstat data from the registry of residence and registry for foreigners.

Coverage
Units of observation are individual events of moving, i.e. settling on the territory of Montenegro and his moving out from the territory of Montenegro.

Protection of individual data
Based on the Cooperation Agreement signed between the - Statistical Office and Ministry of - the Interior, data submitted to the Statistical Office do not contain a single feature that allows the identification of persons.

Definitions of basic features – indicators
Immigration is the act by which a person establishes his usual residence on the territory of Montenegro for the period that is are expected to be at least twelve months, which previously had their usual residence in another country.
Emigration is the act by which a person, who has previously had usual residence in the territory of Montenegro, ceases to have their usual residence in Montenegro.
An immigrant is a person who performs immigration.
Emigrant is a person who performs emigration.

The level of data dissemination
Data are presented at the country level.

Deadlines
Data are collected monthly, and processed annually. Deadlines for submission and publication of data are defined in the Annual Plan of official statistics.
