METHODOLOGICAL EXPLANATIONS

Data source and coverage

The presented data are collected by the quarterly report of construction activity GRADJ-31. The survey are realised on a sample basis. The frame for a sample is enterprises with 5 and more employees who are in a statistical business register according to the Classification of activities classified in sector F – Construction, as well as companies (KAU) whose business units engaged in construction works. Survey covers all large and medium enterprises (class 2 and 3), while small enterprises (class 1) is selected by random simple sample.

Definitions

Value of finalised construction works are includes: material costs, labour costs, demolition and preparation of field, installation costs, general costs and profit. The value does not include expenses of buying the land, engineering, monitoring and VAT. The data on value of finalised work refer to works performed in the reporting period on finished and unfinished constructions. The value of finalised construction works is expressed in current prices.

Effective hours worked include hours actually worked by workers engaged at the construction sites during regular working hours, as well as overtime work.

According to the Revision policy of the Statistical Office, the final data shall be published with the date defined by the Statistical Release Calendar.
