## METHODOLOGICAL EXPLANATIONS

Industrial production indices are one of the most important short-term indicators and a basis for decision making in the area of economy.

Monthly report on industry IND-1 provides the data on industrial production (quantity of products produced in the reporting month, from beginning to the end of reporting month, quantities of final products in stocks, sale of final products from beginning to the end of reporting month, value of production in reporting month, number of workers, gross earnings of employees, number of hours worked, value of stock, profit from sale - turnover).

Statistical Business Register (SBR) is used as the frame for the coverage for the purposes of this survey. Reporting units are businesses engaged in the industrial production (sectors B, C and D of Activity Classification), as well as parts of commercial businesses classified into other sectors of Activity Classification, and they satisfy the criteria for this survey.

The data are published on the 15<sup>th</sup> in a month for the previous one, as well as in our website [www.monstat.org](http://www.monstat.org).
