METHODOLOGICAL EXPLANATION

Source of data

Data on fixed capital investment are collected by survey "Annual Report on Fixed Capital Investments" (INV-01) from business entities in the country if they are direct investors. Data are collected according to a stratified sample and stratification is done according to the Classification of Activities 2010 (Classification of activities 2010) and the number of employees.

Coverage

For the collection and publication of data in official used is the Classification of activities 2010.

In the survey are involved all large and medium-sized enterprises, while small ones were chosen by random sample. The INV-01 questionnaire has been partially changed since 2006 and adapted to international statistical standards and methodologies, European System of National Accounts (ESA 2010).

The data in the Release are grouped according to the organizational principle (according to the main activity and the residence of the investor) and are published at the sector level.

Definitions

Investments in fixed capital are purchases made by business entities in order to acquire new assets, increase the values of or replace existing fixed assets (dwelling buildings, other buildings and structures, machinery and equipment, cultivated biological resources and intellectual property products: research and development, mineral exploration and evaluation, computer software and databases, entertainment, literary or artistic originals and other intellectual property products).

Realized investment during the reference year is the value of actual construction, building or procurement of facilities, equipment etc., regardless of whether they are completed or not and payment made.

Acquired investments goods can be new or already used, purchased or received with no compensation from others in the country or abroad or self-produced. All investments into new capacity extensions, reconstruction and modernization of existing or replacement of old ones, ruined capacities are included. Investments do not cover expenditures spent for regular and current maintenance of existing infrastructure.

The last published data are considered preliminary, and becomes final within the defined deadline, as foreseen by the Statistical Release Calendar.
