

Dear,

Statistical Office of Montenegro, in accordance with the Law on the Implementation of the Census of Agriculture ("Official Gazette of Montenegro", no. 54/09, 14/10), released the results obtained through the Census in five publications until December 2011. The fifth book called Farm Structure - The typology of agricultural holdings shows, for the first time, the classification of agricultural holdings by type of agricultural production and economic size. Both of these elements are based on the standard output of various types of agricultural products. These activities MONSTAT conducted independently. The practice is that Eurostat, after the submission of the database by statistical institution, will develop the typology of each country.

After submitting our database to Eurostat database we found differences between them in data processing done by Monstat and by Eurostat.

Accepting the results obtained by Eurostat data processing, MONSTAT revised the part of the results published in the book The typology of agricultural holdings, which refer to chapter COMMENT (pages 33-64).

COMMENTS

1. Economic size of agricultural holding

As previously published in publications of Census of Agriculture 2010, there were enumerated 48 870 of agricultural holdings of which only 46 business entities performing the agricultural activity. The total 48 870 of agricultural holdings possess 221 297.6 ha of total utilised agricultural land, i.e. average agricultural holding possesses 4.6 ha of agricultural land. According to the data from the Census of Agriculture 2010, labour force in agriculture expressed in the annual work unit (AWU) is 47 042.7 AWU.

Table 1.1. Agricultural holdings by utilised agricultural land, economic size, and labour force

	Number of holdings	Utilised agricultural land ha	ha by holding	Economic size of agricultural holdings	Economic size by agricultural holding	Economic size per ha of agricultural holdings	Labour force on agricultural holdings (AWU)
Agricultural holdings	48 870	221 297.6	4.5	127 064 178.3	2 600.0	574.2	47 042.7
Family agricultural holdings	48 824	212 724.4	4.4	111 152 868.3	2 276.6	522.5	46 473.0
Business entities	46	8 573.2	186.4	15 911 310.0	345 898.0	1 855.9	569.7

Standard Output (SO) of an agricultural product (crop or livestock) is the average monetary value of the agricultural output at farm-gate price. The sum of the individual SO of all the agricultural products present on the holding, and expressed in Euro is "Economic size of agricultural holding". The total value of economic size of agricultural holdings in Montenegro expressed in Euro is 127 064 178.3 or in average EUR 2 600.0 per agricultural holding. An average value of economic size of family agricultural holdings is EUR 2 276.6 i.e. EUR 522.5 per ha of family agricultural holding.

Table 1.2. Labour force on family agricultural holdings by economic size

	Number of holdings	Holding economic size classes					
		Up to 2000	2000≤4000	4000≤8000	8000≤15000	15000≤25000	≥25000
TOTAL	48 824	31 569	9 526	5 277	1 832	441	179
Less than 1 AWU	28 987	23 640	3 736	1 245	276	57	33
1-<2 AWU	12 743	6 118	3 770	2 065	615	117	58
2-<3 AWU	5 459	1 536	1 652	1 469	608	149	45
3 AWU and over	1 635	275	368	498	333	118	43

Of the total 48 824 of agricultural holdings, there are 28 987 or 59.4% of agricultural holdings with less than 1 AWU. Whereas, 56% of family agricultural holdings with EUR 0 – 4 000 also possess less than 1 AWU.

The economic size of agricultural holding is closely linked with the type of agricultural production, thus level and structure of economic size of agricultural holding significantly differs from those of business entities.

The average value of economic size of holding in family agricultural holdings is EUR 2 276.6 ESU, while the average in business entities is EUR 345 898.0. The average value of economic size of agricultural holding in Montenegro is EUR 2 600.0, and the reason is dominant contribution of family agricultural holdings.

There are more than 64% of family agricultural holdings are of economic size value less than EUR 2 000. Of the total number, there are only 179 family agricultural holdings, i.e. 0.4% with the economic value over EUR 25 000.

Chart 1.3.1. Family agricultural holdings by economic size

The average economic value of business entities is EUR 345 898.0. Somewhat more than a half of business entities possesses the economic value over EUR 25 000.

Chart 1.3.2. Business entities by economic size

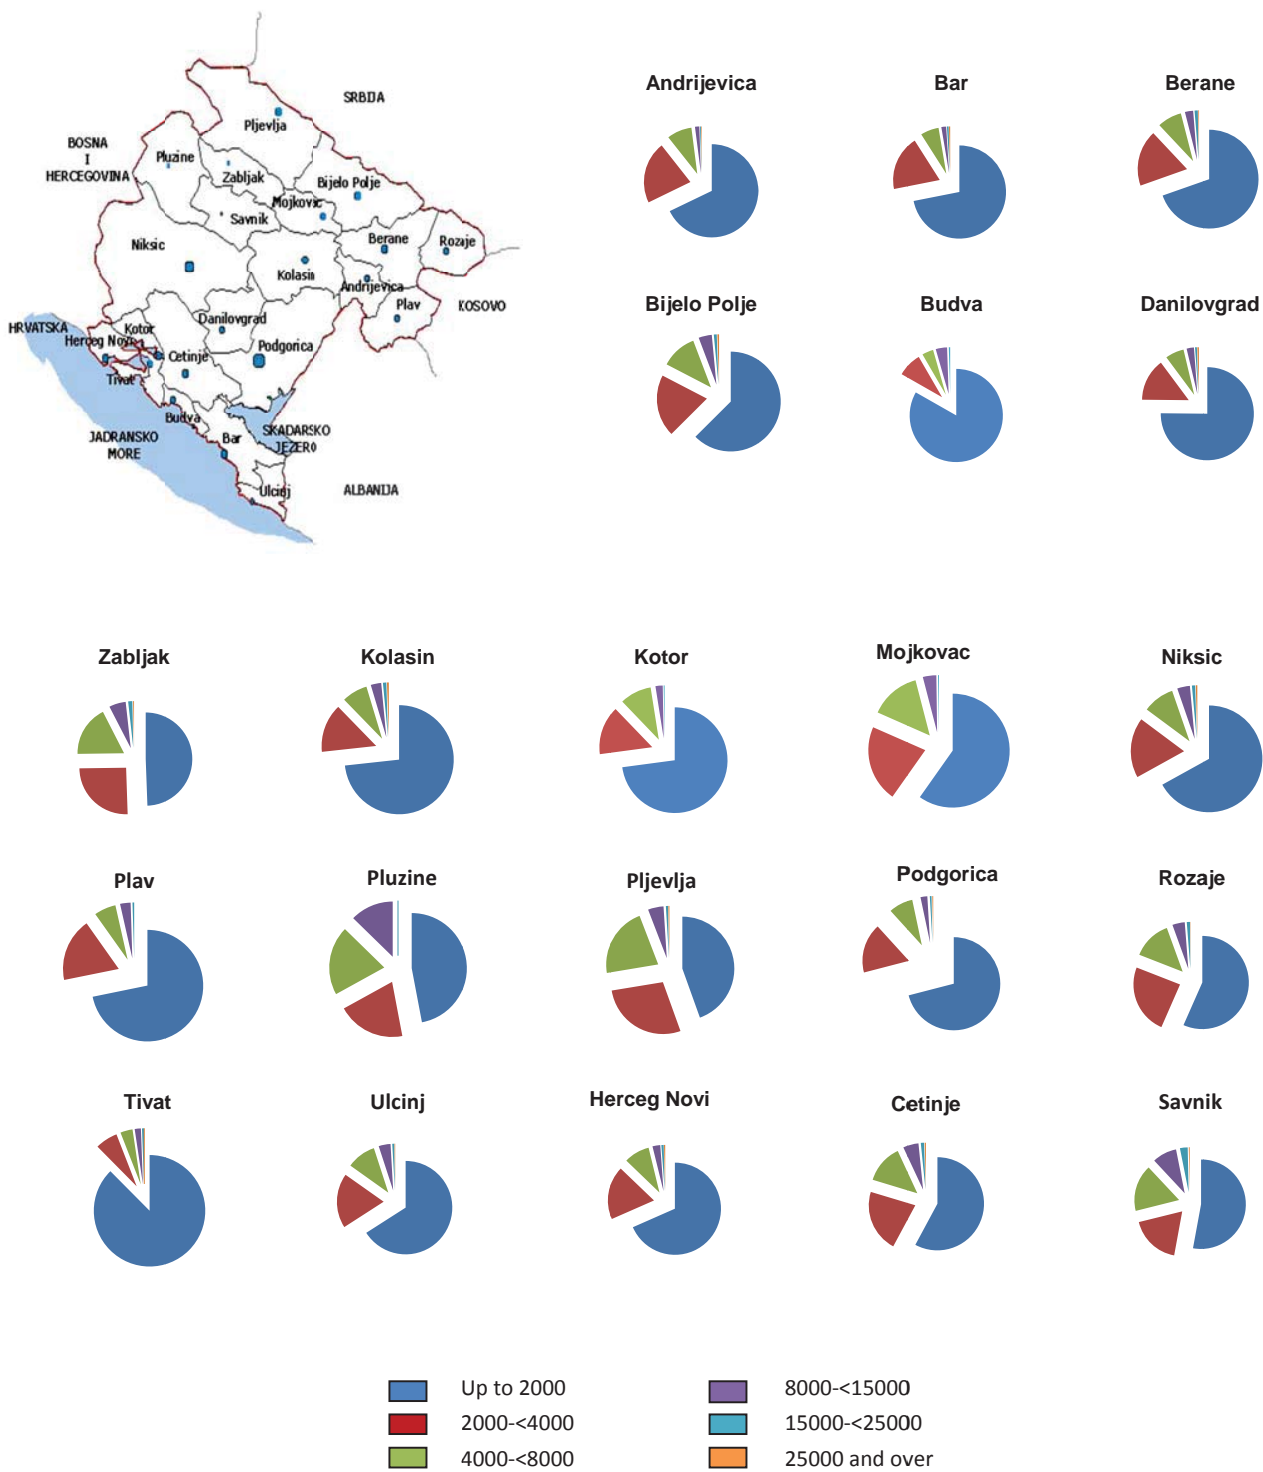

Chart 1.3.3. Family agricultural holdings by economic size, and by municipalities

2. Type of farming (agricultural production)

"The type of farming (agricultural production) of a holding" is the production system of a holding which is characterised by the relative contribution of different enterprises to the holding's total SO. Applying this methodological rule changes recent perception on structure of agricultural holdings. i.e. position that the agriculture of holdings in Montenegro are characterised by mixed farming (agricultural production).

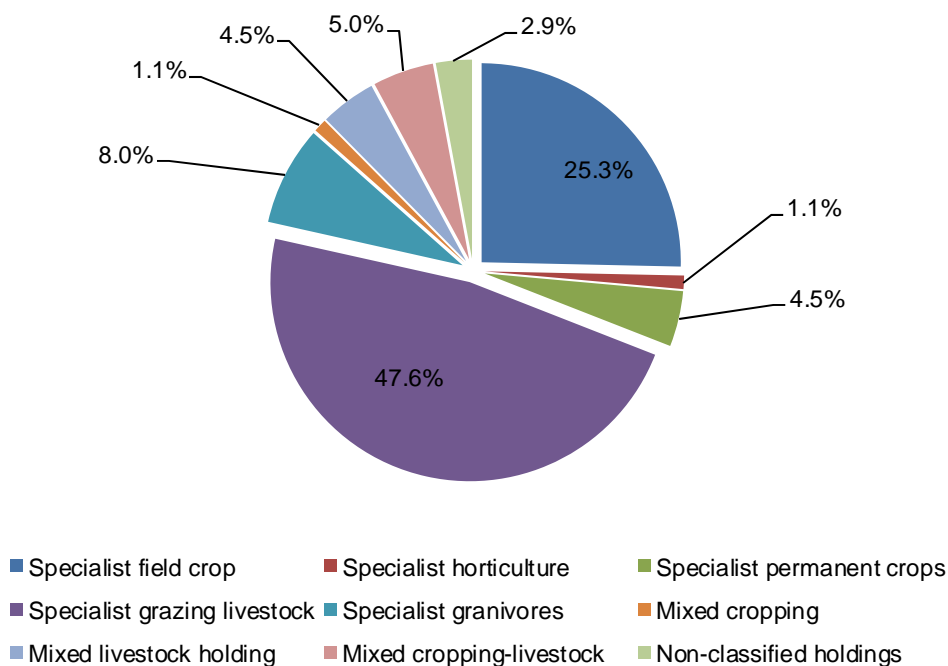

The share of Standard Output (SO) of individual agricultural activities in the total SO value on an agricultural holding indicates that Montenegro has 47.6% of agricultural holdings classified as specialist holdings grazing livestock. and then there are 25.3% of special holdings field crops, which includes Montenegro in group of countries with high share of specialist holdings.

Of the total number of agricultural holdings, there are only 8.0% of specialist holdings – specialist granivores, 4.5% of agricultural holdings with the mixed livestock, and 5.0% mixed cropping and livestock.

Chart 2.1 Agricultural holdings by type of farming

There are only 2.9% of non-classified holdings (family agricultural holdings with kitchen garden, fisherman’s cooperatives, and similar).

The economic value of family agricultural holding is within the specialist horticulture (EUR 4 564), mixed cropping-livestock (EUR 3 811), mixed livestock holdings (EUR 3 497).

Chart 2.2. Family agricultural holdings and by type of farming (agricultural production)

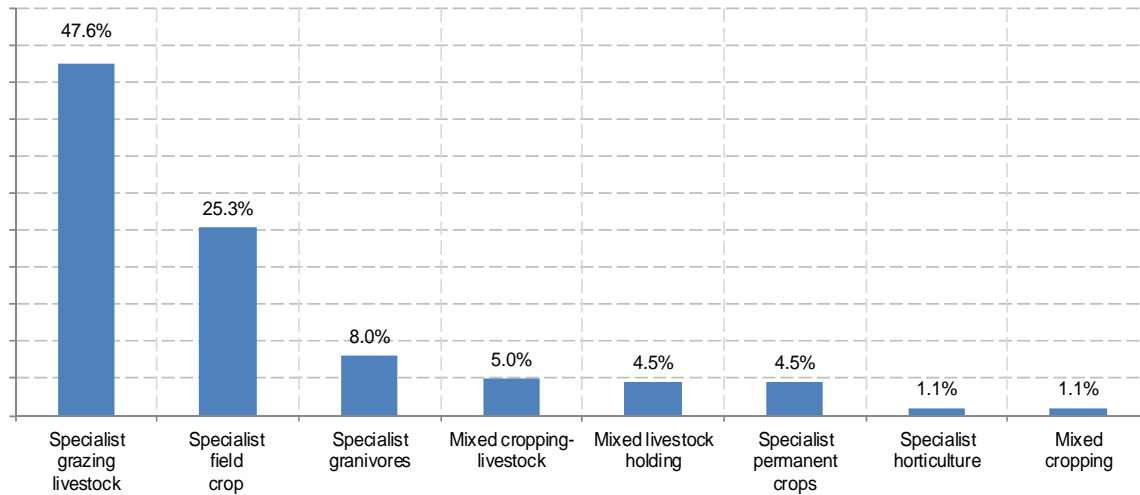

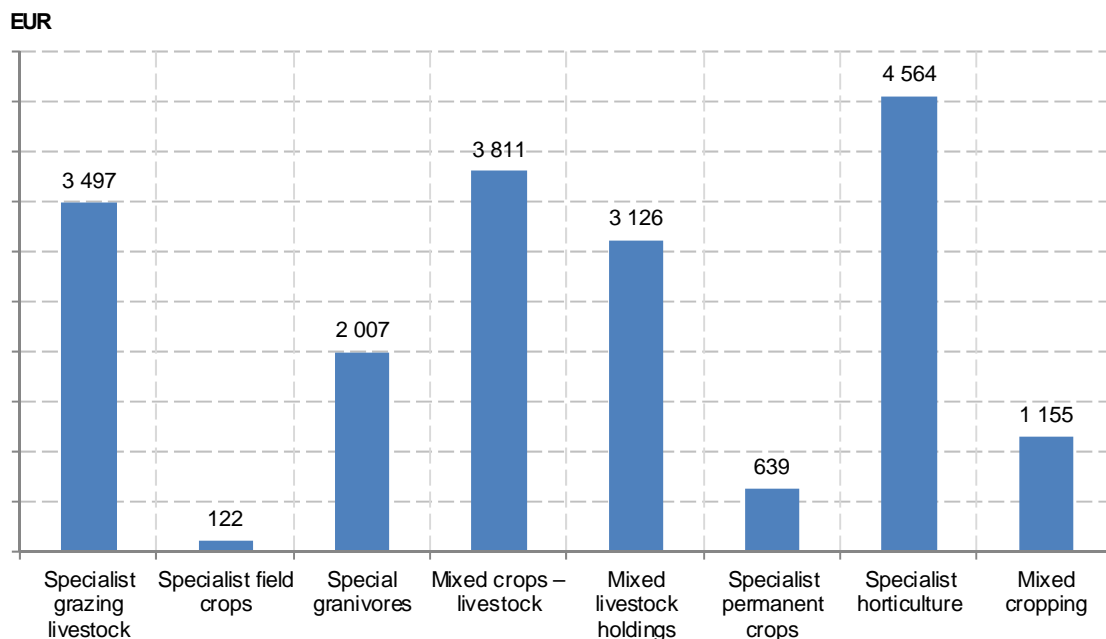

Chart 2.3. Family agricultural holdings by economic value of a holding, and by type of farming

The structure of farming types of agricultural holdings differs among municipalities, but almost every municipality is represented with holding specialist grazing livestock, except Budvi and Danilovgrad with holdings specialist field crops. In regard with Podgorica, the ratio is the same. Specialist field crops is the most present on family agricultural holdings in municipality Niksic, and specialist grazing livestock in municipality Bijelo Polje.
