

## INDUSTRIJA

### Izvori i metodi prikupljanje podataka

Podaci statistike industrije obezbjeđuju se iz knjigovodstvene, kadrovske i druge evidencije i dokumentacije izvještajnih jedinica. Statistika ih prikuplja mjesečnim, godišnjim i višegodišnjim istraživanjima. Mjesečnim izvještajem industrije prikupljaju se naturalni podaci o proizvodnji, utrošku sirovina, elektroenergije i goriva, kao i podaci o broju zaposlenih. Na osnovu tih podataka obračunavaju se indeksi proizvodnje, potrošnje, zaposlenih i produktivnosti rada. Podaci za bilans proizvodnje i potrošnje elektroenergije prikupljaju se u okviru posebnih istraživanja koje sprovodi MONSTAT.

Podaci o korišćenju kapaciteta industrije prikupljaju se od preduzeća godišnjim izvještajem industrije (na bazi nomenklature proizvoda) i izvještajem o korišćenju kapaciteta industrije svake pete godine (na bazi nomenklature osnovnih oruđa za rad).

### Obuhvatnost

Do 2001. godine prema Jedinствenoj Klasifikaciji djelatnosti pod industrijom se podrazumijeva industrija u užem smislu, koja obuhvata proizvodnju elektroenergije, rudarstvo i fabričku preradu rudarskih, šumskih i poljoprivrednih sirovina.

U Klasifikaciji djelatnosti koja je sastavni dio Zakona o Klasifikaciji djelatnosti i o Registru jedinica razvrstavanja ("Sl.list SRJ" br.31/96, 12/98 i 74/99) koja se primjenjuje od 1. januara 2001. godine, djelatnost industrije čine sektori:

Vađenje ruda i kamena, prerađivačka industrija, proizvodnja i snabdijevanje električnom energijom, gasom i vodom.

Izvještajima o industrijskim preduzećima obuhvaćena su društvena, zadružna i mješovita preduzeća, kao i djelovi neindustrijskih preduzeća koji obavljaju industrijsku djelatnost i ona privatna preduzeća koja su transformacijom prešla iz društvenih u privatna, veliki broj malih privatnih preduzeća, kao i namjenska proizvodnja.

### Definicije

*Industrija* je djelatnost u kojoj se obavlja proizvodnja različitih proizvoda i prerada sirovina mineralnog, biljnog, životinjskog ili vještačkog porijekla. Osnovne karakteristike industrije su proizvodnja velikih količina proizvoda, ujednačenog kvaliteta, uz pretežnu upotrebu mašinskih sredstava za rad.

*Industrijsko preduzeće* je subjekat čija je pretežna djelatnost Industrijska proizvodnja.

*Industrijski proizvodi* su definisani kao ukupna gotova proizvodnja proizvoda navedenih u nomenklaturi proizvoda koja je trajan osnov za prikazivanje industrijske proizvodnje. Indeksi za industriju ukupno daju se po Jedinствenoj Klasifikaciji djelatnosti (JKD) i ne obuhvataju zanatstvo, distribuciju gasovitih goriva, distribuciju pare i tople vode, sakupljanje, prečišćavanje i distribuciju vode i izdavačku djelatnost. Ove djelatnosti po JKD nijesu pripadale industriji.

*Indeks fizičkog obima industrijske proizvodnje* izražava promjene u obimu cjelokupne industrijske proizvodnje.

Indeksi fizičkog obima proizvodnje računaju se uz pomoć odgovarajuće šifarske veze Klasifikacije djelatnosti i Nomenklature proizvoda. Kod obračuna su zanemarene neznatne razlike koje nastaju zbog razvrstavanja proizvoda.

Obračun se zasniva na mjesečnim i godišnjim podacima o gotovoj proizvodnji, koji se iskazuju u naturalnom obliku prema Nomenklaturi proizvoda za mjesečni izvještaj i mjerilima ponderacionog sistema.

## INDUSTRY

### Sources and methods of data collection

Data of industry statistics are obtained from bookkeeping records, human resources evidence and other documentation of reporting units. These data are collected through surveys on a monthly, annual and multi-annual basis. Data on production, consumption of raw materials, electricity, and fuels as well as data on employees are collected on a monthly basis. These data are used for the indices of production, consumption, employees and labour productivity. Data on production and consumption of electric power are collected through other surveys carried out by MONSTAT.

Data on exploitation of industrial capacities are collected through annual industrial survey (on the basis of nomenclature of products) and survey on use of industrial capacities conducted every five years (based on nomenclature of primary work tools).

### Coverage

Up to 2001, according to the Unique Classification of Economic Activities, industry referred to industry in a narrower sense comprising electric power generation and consumption, mining and processing of mining, forest and agricultural raw materials.

Since January 1st 2001, the Classification of Activities has been introduced, as the integral part of the Law on Classification of Activities and Units of Register (Official Gazette of FRY no. 31/96, 12/98 and 74/99). According to the classification, the industry comprises activities of the following sectors:

Mining and quarrying, Manufacturing, Electricity, gas and water supply.

Surveys on industrial enterprises cover all enterprises of public, cooperative and mixed ownership, as well as parts of non-industrial enterprises involved in industrial activities, private enterprises transformed from public into private ownership, great number of small private enterprises and restricted/specific production.

### Definitions

*Industry* refers to production of various products as well as processing of raw materials of mineral, floral, animal or artificial origin. The main characteristics of industry are production of huge products quantities with standardized quality, mainly using machinery tools.

*Industrial enterprise* is an entity engaged in industrial production as the principal activity.

*Industrial products* are defined as total final production of those products that are listed in the Nomenclature of industrial products that is a standard reference for presentation of industrial production. Industrial indices are calculated according to the Unique Classification of Activities (UCA) excluding crafts, gaseous fuels distribution, steam and hot water distribution, collection, purification and distribution of water and publishing activities. According to UCA these activities were not part of industry.

*Index of physical volume of industrial production* represents changes in volume of total industrial production.

Calculation of the Index is done with the corresponding code relations between Classification of Activities (CA) and Nomenclature of Industrial Products (NIP). Small, insignificant differences caused by classification of products are simply ignored

Calculation is based on data from monthly and annual surveys / reports on final products, shown in physical terms according to NIP for monthly report and criteria of weighting system.

Zaključno sa 1969. godinom ponderacioni koeficijenti su formirani na osnovu ličnih primanja i amortizacije, a od 1970. godine na osnovu društvenog proizvoda.

Za obračun indeksa industrijske proizvodnje od 1993. do 1997. godine primjenjivani su ponderacioni koeficijenti obračunati na osnovu podataka o industrijskoj proizvodnji Crne Gore u 1990. godine. Od 1997. godine koriste se ponderacioni koeficijenti obračunati na osnovu podataka za 1995. godinu.

Zbog razlike u ponderima indeks fizičkog obima industrijske proizvodnje do 1991. ne pokazuje istu dinamiku kao obračuni društvenog proizvoda i narodnog dohodka u stalnim cijenama.

*Indeks zaposlenih* obuhvata samo zaposlene industrijskih djelatnosti (bez zaposlenih koji u industrijskim preduzećima rade u neindustrijskim djelatnostima). Zaposleni u industriji svrstavaju se u cjelini u granu pretežne djelatnosti preduzeća do 1988. godine, prema čistoj djelatnosti. Indeks je obračunat na osnovu neponderisanih podataka o zaposlenima, bez obzira na kvalifikacije, radno iskustvo ili pol.

*Indeks produktivnosti rada u industriji* izražava dinamiku društvene produktivnosti rada, koja predstavlja odnos indeksa fizičkog obima proizvodnje i indeksa zaposlenih.

Until 1969, weighting coefficients were calculated on the basis of personal incomes and amortization, and since 1970 on the basis of domestic product.

In the period from 1993 until 1997, Index of industrial production was based on the new weighting coefficients calculated from the data on industrial production of Montenegro in 1990. As of 1997, the weighting coefficients calculated from 1995 data have been used.

Due to difference in weights, the index of physical volume of industrial production until 1991 did not show the same dynamics as compilations of domestic product and national income in constant prices.

*Index of employees* covers only employees within industrial activities (excluding employees in industrial enterprises engaged in non-industrial activities). Until 1988, all employees in industry were classified according to the principal activity of enterprise, pure activity. The index was calculated on the basis of non-weighted data about employees, regardless of their qualifications, working experience or sex.

*Indices of labour productivity in industry* show dynamics of social labour productivity, which represents the ratio of Index of physical volume of production and Index of employees.
