## METHODOLOGICAL NOTES

### Data source

The data on the rail transport are the result of regular monthly surveys on reporting units with the transport of passengers and goods by rail as their main activity.

### Coverage

Surveys cover enterprises classified by the Classification Unit Register according to the activity classification in Section H (Transport and storage), Area 49.

### Definitions

*Transport* is the movement of passengers and goods and from place of loading to place of unloading.

*Passenger* is every person with ticket or appropriate document entered the train with the aim to travel to desired place.

*Passenger kilometre* presents the transport of one person over the distance of 1 km.

*Goods transported* are goods transferred based on the contract on transport. The quantity of goods transported is expressed in gross weight, meaning that the quantity of goods covers also the quantity of packaging or packing material (containers).

*Tonne-kilometres* indicate transport of one-tonne goods over the distance of 1 km.
