METHODOLOGICAL NOTES

Source of data

The data on local transport are the result of regular quarterly surveys on reporting units with the carriage of passengers in the local transport as the main activity.

Coverage

Surveys covers enterprises classified in the Classification Unit Register according to the activity classification in Section H (Transport and storage), Area 49.

Definitions

City traffic and traffic in suburb represent a completely organised public transport of passengers performed by buses of city and suburb transport companies, in towns and suburb settlements, as well as transport from and to airport. and other places in the area of town. City and suburb transport is only done as the line transport.

Transport in local traffic is a movement of passengers from the place of loading/embarkation to the place of unloading/disembarkation.

Passenger is every person with the bus ticket or appropriate documentation having entered in the bus with the aim to travel to desired place.
