¹ Annual index of transport of goods in airports in February 2012 is low because increased transport of goods in extraordinary traffic in February 2011.

METHODOLOGICAL NOTES

Source of data

The data on traffic at the airports are the result of regular monthly surveys on reporting units engaged in the service activities in air transport (Section H, Area 52).

Coverage

The surveys cover enterprises classified within the Classification Unit Register by the activity classification in Section H (Transport and storage), Area 52.

Definitions

Airport is certain land or water area (including all buildings, facilities, and equipment) intended for aircraft take-off and landing, as well as for movements of aircrafts on the land area, and open for commercial air transport.

Transport is a movement of passengers and goods from the place of embarkation to place of disembarkation.

Passenger is every person with the flight ticket or appropriate document entered in the aircraft with the aim to travel to desired place

Goods transported are all freight and mail carried/loaded and unloaded on the basis of transport contract. The quantity of goods is expressed as the gross weight, meaning that the quantity of goods also covers the quantity of packaging or packing material (containers).

Regular commercial service of air transport of passengers and goods is service offered by performing flights based on published flight timetable.

Extraordinary commercial air transport is made of commercial flights not belonging into regular commercial flights.
