METHODOLOGICAL NOTES

Source of data

The data on traffic at the airports are the result of regular quarterly surveys on reporting units engaged in the service activities in air transport (Section H, Area 52).

Coverage

The surveys cover enterprises classified within the Classification Unit Register by the activity classification in Section H (Transport and storage), Area 52.

Definitions

Airport is certain land or water area (including all buildings, facilities, and equipment) intended for aircraft take-off and landing, as well as for movements of aircrafts on the land area, and open for commercial air transport.

Transport is a movement of passengers and goods from the place of embarkation to place of disembarkation.

Passenger is every person with the flight ticket or appropriate document entered in the aircraft with the aim to travel to desired place.

Goods transported are all freight and mail carried/loaded and unloaded on the basis of transport contract. The quantity of goods is expressed as the gross weight, meaning that the quantity of goods also covers the quantity of packaging or packing material (containers).
