METHODOLOGICAL NOTES

Data source

The data on traffic in airports are results of regular monthly surveys from reporting units performing air transport service (Sector H, Area 51).

Coverage

Surveys cover enterprises from Unit Classification Register classified by Activity Classification in Sector H (Transport and storage), Area 51.

Definitions

Airport is defined area of land or water (including any buildings, installations and equipment) intended to be used for the arrival, departure and surface movement of aircraft and open for commercial air transport operations.

Airline (Commercial air transport operator) is an aviation enterprise operating aircraft for commercial purposes which (i) performs air transport services and is certified for such purposes.

Air transport is any movement of goods and/or passengers from the place of embarking to the place of landing on an aircraft movement.

Air passenger is any person, provided with the flight ticket or appropriate flight document who has entered the aircraft with the aim to travel to the place of destination.

Passenger-kilometre performed is one of main indicators of effect of air transport operator relating to total length of all passengers transport in all destinations in the country or abroad.

Scheduled air service for passenger and goods transport is a commercial air service operated according to a published timetable.

Non-scheduled air service is a commercial air service other than scheduled air service.
