METHODOLOGICAL NOTES

Data source

Data on the operations of domestic affiliates are collected with annual report on statistics of domestic affiliates (Ifats). The methods used to collect and publish data on the activities of domestic branches are adapted to the international statistical standards in accordance with Regulation EC No 716/2007.

Coverage

Cover all sectors of activity classification KD2012 B - N, which is in accordance with NACE Rev. 2, except Sector K (Financial and insurance activities).

For the collection and publication of data classification of economic activities NACE Rev. 2. is used and data are published at sector level.

Definitions

Foreign affiliate is a company resident in a country that collects data and managed by institutional units based outside the country.

IFats statistics about domestic affiliates implies statistics describing the activities of affiliates in our economy controlled by an institutional unit based outside of Montenegro.

The ultimate control over institutional unit of a foreign affiliate involves institutional unit that is located at the end of the chain of control and which is not controlled by another institutional unit.

Gross output is defined as the market value of all goods and services produced. Intermediate consumption at purchase prices is the value of products and services that are transformed, used or consumed in the production process.

Gross value added is the difference between gross output and intermediate consumption.
