

Introduction

Statistical Office of Montenegro - MONSTAT builds contemporary statistical system that helps Montenegrin statistics to be comparable with international statistics and statistical methodologies.

Related to that MONSTAT made revision of foreign trade data for period 2005-2009. The reason of revision is harmonization with running EU standards. Data are processed using special trade system, import data are recorded based on country of origin. Difference in data is because of changes in trade system, updated data base for revised period as well as recording import by country of origin. In this way data from 2005 to 2009 are completely comparable.
