## METHODOLOGICAL NOTES

### Data sources

The data on internal trade of enterprises engaged in the retail trade are collected by regular monthly survey. The survey is based on the sample and covers enterprises classified in areas 50 and 52 in accordance with Activity Classification.

### Coverage

Internal trade statistics covers and presents turnover of enterprises with the retail trade as their main activity and some large companies engaged in retail and are registered in another activity. Monthly survey on retail trade is conducted at the basis of sample including all large and middle enterprises. and small and micro ones are defined by the random sample method.

### Definitions

Turnover of goods in retail trade represents the value of goods of enterprises sold to to final consumers. i.e. population for personal consumption and household use. as well as to legal and natural persons for performing industries.

Indices of turnover of goods in constant prices are received by deflating index in current prices. by appropriate indices of retail goods prices.

All published indices should be treated as previous. what means that certain corrections based on received results are possible.
