## METHODOLOGICAL NOTES

### Data source

The data on trade of motor vehicles and motorcycles are collected by regular monthly survey. The survey is sample based, and it covers enterprises classified within Register of Classifying Units in area 45 according to activity classification NACE Rev.2. Until January 2012, Trade of motor vehicles and motorcycles was observed through Monthly survey on retail trade (Trg10). Having applied new activity classification NACE Rev.2, data on trade of motor vehicles and motorcycles are obtained through a separate monthly survey Trg10M.

### Coverage

Statistics on retail trade of motor vehicles and motorcycles also covers and presents turnover of enterprises with main activity in area 45. This monthly survey on retail trade is conducted on the basis of sample covering all large and medium enterprises, and small and micro enterprises are defined by random sample approach.

### Definitions

Turnover of goods in retail trade is a value of sold goods enterprise which was sold to final consumers, i.e. population for personal consumption, household use, and both legal and natural persons for performing activities.

Indices of turnover of goods in constants prices are obtained through deflating index in current prices with appropriate indices of retail price of goods.

All published indices should be treated as previous ones, meaning that there may occur certain corrections based on results received.
