METHODOLOGICAL EXPLANATIONS

The data on average monthly earnings present earnings paid within a month, and they are received by the regular monthly survey Monthly report on employees and earnings (RAD–1 form).

The average earnings (gross) are calculated dividing the total earnings paid off in a month by the number of employees the paid earnings refer to. Earnings without taxes and contributions (net) comprise earnings (gross) reduced by taxes and contributions paid by employee.

The index on real average earnings without taxes and contributions (net) represent the ratio between index on nominal average earnings without taxes and contributions (net), and consumer price index.

The data are released 30th in a month for the previous one, as well as in our website: www.monstat.org
