**CIJENE PROIZVODAČA INDUSTRIJSKIH PROIZVODA**

Pod prodajnom cijenom proizvođača industrijskih proizvoda podrazumijeva se cijena po kojoj proizvođači prodaju svoje proizvode u najvećim količinama na domaćem tržištu. U cijenu ulazi regres koji ostvaruje prodavac a odbija se rabat, popust, kasa skonto i sl. ako ih prodavač odobrava kupcima. U cijenu se ne ulazi porez na dodatu vrijednost.

Ove cijene prikupljaju se mjesecima izvještajima koje neposredno dijelom izabranima proizvođačima za oko 250 industrijskih proizvoda. Izbor industrijskih proizvođača izvršen je prema njihovom učešću u ukupnoj realizaciji određene oblasti.

Prosječne mjesečne cijene računaju se ponderisanjem tekućih mjesečnih cijena odgovarajućih proizvoda, a godišnje prosječne cijene proizvođača industrijskih proizvoda predstavljaju neponderisani prosjek mjesečnih cijena.

Indeksi cijena izračunavaju se ponderima na bazi podataka o realizaciji industrijske proizvodnje. Svake godine vrši se korekcija pondera, a novi ponderi izračunavaju se svake pete godine.

Indeksi cijena proizvođača industrijskih proizvoda preračunavaju se početkom svake godine na prethodnu godinu kao baznu.

**POTROŠAČKE CIJENE**

Potrošačke cijene su cijene po kojima trgovina na malo, individualni proizvođači i vršioci usluga prodaju svoje proizvode i usluge krajnjim potrošačima, uključujući sve poreze i takse koje se plaćaju u prometu na malo.

Potrošačke cijene se prikupljaju u pet gradova: Podgorici, Nikšiću, Bijelom Polju, Budvi i Baru koji predstavljaju važeće tržišne centre.

Lista proizvoda obuhvaća oko 576 najznačajnijih proizvoda i usluga lične potrošnje. Osnovnim kriterijum izbora je učešće koje proizvođač se ponderišu strukturom potrošnje domaćinstava.

Prosječne mjesečne cijene za grad kod svih proizvoda i usluga, računaju se neponderisanim geometrijskom sredinom, dok se prosječne mjesečne cijene za Cnu Goru računaju na bazi prosječnih cijena iz pet gradova koje se ponderišu strukturom potrošnje domaćinstava.

Prosječne godišnje potrošačke cijene predstavljaju neponderisani prosjek cijena za dvanaest mjeseci.

Indeksi potrošačkih cijena preračunavaju se početkom svake godine na prethodnu godinu kao baznu.

**PRODUCER PRICES OF INDUSTRIAL PRODUCTS**

Producer prices of industrial products are the price according to which the producers sell their products in the most numerous quantities on the domestic market. The price also includes the regress achieved by the producer, and deduces the rebate, discounts, cash sconto, etc., if the producer approves them to the buyer. The price does not include value added tax.

These prices are collected through the monthly surveys submitted directly by the chosen enterprises for about 250 industrial products. The list of industrial enterprises is done on the basis of their participation in the total realization of certain area.

Average monthly prices are calculated by weighting the current monthly prices of corresponding products, and annual average producer prices of industrial products present the un-weighted average of the monthly prices.

Indices of producer prices of industrial products are recalculated in the beginning of each year using the previous year as the base year.

**CONSUMER PRICES**

Consumer prices are the prices at which the retail shop, custom manufacturers and service providers sell their products and services to consumers, including all taxes and fees that are paid in retail trade.

Consumer prices are collected in the five municipalities: Podgorica, Niksic, Bijelo Polje, Budva and Bar which represent major market centers.

The list of products contains about 576 representative products and services of individual consumption. The main criterion of choice is share of group's products in personal consumption, so that the selected represented products for all classes of COICOP classification whose participation in the consumption exceeds 0.1%.

Average monthly prices for the city for all products and services are calculated by non-weighted geometric mean, while the average monthly prices for Montenegro are calculated based on average price in five cities that are weighted by structure of household consumption.

Average annual consumer prices represent the non-weighted average of prices for twelve months.

Consumer price indices are recalculated in the beginning of each year using the previous year as the base year.
