U MJESECNOM STATISTIČKOM PREGLEDU Uprava za statistiku – MONSTAT objavljuje podatke za Crnu Goru, koji se prikupljaju i obrađuju u skladu sa programom statističkih istraživanja i rezultat su rada proizvođača zvanične statistike.

Statistički podaci u MJESECNOM STATISTIČKOM PREGLEDU prikazani su u godišnjim, kvartalnim i mjesečnim serijama i sistematizovani su u dva dijela. Godišnje serije obuhvataju tri do pet posljednjih uzastopnih godina. Kvartalne serije se odnose na kvartale u prošloj i tekućoj godini, a mjesečne serije obuhvataju period od trinaest mjeseci iz tekuće i prethodne godine. Ispod odgovarajućih tabela, gdje je potrebno, daju se kratka objašnjenja.

Pored podataka koje prikuplja i obrađuje Uprava za statistiku - MONSTAT, u MJESECNOM STATISTIČKOM PREGLEDU se objavljuju i podaci Zavoda za zapošljavanje Crne Gore, Centralne Banke i Poreske Uprave Crne Gore.

Podaci za tekuću godinu su obično preliminarni što znači da su podložni promjenama u toku statističke obrade. Ovi podaci se označavaju oznakom (p) i predmet su redovnih revizija kroz naredne brojeve Mjesečnog statističkog pregleda.

Sadržaj publikacije je prilagođen međunarodnim potrebama i obavezama u smislu primjene Klasifikacije djelatnosti (NACE Rev2), koja se primjenjuje od 8. aprila 2011. godine.

Od januara 2008. godine MJESECNI STATISTIČKI PREGLED je preveden na engleski jezik.

CIJENE

CIJENE PROIZVODA INDUSTRIJSKIH PROIZVODA

Pod prodajnom cijenom proizvođača industrijskih proizvoda podrazumijeva se cijena po kojoj proizvođači prodaju svoje proizvode u najvećim količinama na domaćem tržištu. U cijenu ulazi regres koji ostvaruje prodavač a odbija se rabat, popust, kasa skonto i sl, ako ih prodavač odobrava kupcima. U cijenu ne ulazi porez na dodatu vrijednost.

Ove cijene prikupljaju se mjesečnim izvještajima koje neposredno dostavljaju izabrana preduzeća za oko 250 industrijskih proizvoda. Izbor industrijskih preduzeća izvršen je prema njihovom učešću u ukupnoj realizaciji određene oblasti.

Prosječne mjesečne cijene računaju se ponderisanjem tekućih mjesečnih cijena odgovarajućih proizvoda, a godišnje prosječne cijene proizvođača industrijskih proizvoda predstavljaju neponderisani prosjek mjesečnih cijena.

Indeksi cijena izračunavaju se ponderima na bazi podataka o realizaciji industrijske proizvodnje. Svake godine vrši se korekcija pondera, a novi ponderi izračunavaju se svake pete godine.

Indeks cijena proizvođača industrijskih proizvoda preračunavaju se početkom svake godine na prethodnu godinu kao baznu.

POTROŠAČKE CIJENE

Potrošačke cijene su cijene po kojima trgovina na malo, individualni proizvođači i vršnici usluga prodaju svoje proizvode i usluge krajnjim potrošačima, uključujući sve poreze i takse koje se plaćaju u prometu na malo.

Potrošačke cijene se prikupljaju u pet gradova: Podgorici, Nikšiću, Bijelom Polju, Budvi i Baru koji predstavljaju veće tržišne centre. Lista poizvoda obuhvata oko 576 najznačajnijih proizvoda i usluga ličnog potrošnja. Osnovni kriterijum izbora je učešće grupe proizvoda u ličnoj potrošnji, tako da su izabrani reprezentativni proizvodi za sve klase COICOP klasifikacije čije učešće u potrošnji prelazi 0,1%

Prosječne mjesečne cijene za grad kod svih proizvoda i usluga računaju se neponderisanom geometrijskom sredinom, dok se prosječne mjesečne cijene za Cnu Goru računaju na bazi prosječnih cijena iz pet gradova koje se ponderišu strukturom potrošnje domaćinstava.

Prosječne godišnje potrošačke cijene predstavljaju neponderisani prosjek cijena za dvanaest mjeseci.

Indeksi potrošačkih cijena preračunavaju se početkom svake godine na prethodnu godinu kao baznu.

Prices

PRODUCER PRICES OF INDUSTRIAL PRODUCTS

Producer prices of industrial products are the price according to which the producers sell their products in the most numerous quantities on the domestic market. The price also includes the regress achieved by the producer, and deduces the rebate, discounts, cash sconto, etc., if the producer approves them to the buyer. The price does not include value added tax.

These prices are collected through the monthly surveys submitted directly by the chosen enterprises for about 250 industrial products. The list of industrial enterprises is done on the basis of their participation in the total realization of certain area.

Average monthly prices are calculated by weighting the current monthly prices of corresponding products, and annual average producer prices of industrial products present the un-weighted average of the monthly prices.

Price indexes are calculated with weights based on the data on the total realization of industrial production. The correction of weights is done every year, and the new weights are calculated every five years.

Indices of producer prices of industrial products are recalculated in the beginning of each year using the previous year as the base year.

CONSUMER PRICES

Consumer prices are the prices at which the retail shop, custom manufacturers and service providers sale their products and services to consumers, including all taxes and fees that are paid in retail trade.

Consumer prices are collected in the five municipalities: Podgorica, Niksic, Bijelo Polje, Budva and Bar which represent major market centers.

The list of products contains about 576 representative products and services of individual consumption. The main criterion of choice is share of group's products in personal consumption, so that the selected represented products for all classes of COICOP classification whose participation in the consumption exceeds 0.1%.

Average monthly prices for the city for all products and services are calculated by non-weighted geometric mean, while the average monthly prices for Montenegro are calculated based on average price in five cities that are weighted by structure of household consumption.

Average annual consumer prices represent the non-weighted average of prices for twelve months.

Consumer price indices are recalculated in the beginning of each year using the previous year as the base year.

ŠUMARSTVO

Izvori podataka i obuhvatnost

Podaci se prikupljaju mjesečnim istraživanjem o proizvodnji šumskih sortimenata u državnim šumama ŠUM-22. Ovim istraživanjem su obuhvaćena sva preduzeća koja u državnim šumama vrše proizvodnju šumskih sortimenata, tj. područne jedinice Uprave za šume.

Definicije

Indeks fizičkog obima iskorišćavanja šuma obračunava se na osnovu podataka o proizvodnji šumskih sortimenata, prema nomenklaturi proizvoda i ponderacionih koeficijenata. Količine predstavljaju neto drvnu masu sortimenata izraženu u kubnim metrima. Za izračunavanje indeksa proizvodnje šumskih sortimenata kao koeficijenti ponderacije koriste se prosječne prodajne cijene proizvoda.

FORESTRY

Data sources and coverage

The data are collected on the basis of the monthly survey on production of forest assortments in state forests. This survey covers all business entities that carry out the production of forest assortments in the state forests, i.e., local units of the Forest Administration.

Definitions

The physical volume index of forests exploitation is calculated on the basis of data on the production of forest assortments, according to the present nomenclature of products and weights coefficients. Quantities represent net wood mass of assortments expressed in cubic meters. In order to calculate the index of forest assortments production, average purchase prices are used as weighting coefficients.

INDUSTRIJA

Izvori podataka

Prikazani podaci prikupljaju se Upitnikom istraživanja industrije.

Obuhvatnost

Istraživanjem industrije obuhvataju se privredna društva kao i njihovi djelovi koji obavljaju industrijsku djelatnost, odnosno koji su prema Klasifikaciji djelatnosti (KD 2010) razvrstani u sektore: Vađenje rude i kamena, Preradivačka industrija i Snabdijevanje električnom energijom, gasom, parom i klimatizacija. Prvredna društva neindustrijskih djelatnosti su izvještajne jedinice ako u svom sastavu imaju jedinicu koja se bavi industrijskom djelatnošću.

Definicije

Ukupan promet odnosi se na promet od prodaje dobara i usluga umanjen za popuste i povraćaje, subvencije i bez PDV-a. Vrijednost se iskazuje u hiljadama EUR.

Gotova proizvodnja predstavlja količinu proizvoda koji su dostigli odgovarajući stepen obrade, tako da je šifra i naziv proizvoda definisan po važećoj Nomenklaturi industrijskih proizvoda. Term “Product is finished when its correctness checking product quality control. Defective products are not considered as finished products.”

Proizvodnja se iskazuje prema Nomenklaturi industrijskih proizvoda, koju čine industrijski proizvodi i usluge razvrstane po djelatnostima u kojima su proizvedeni.

Indeks obima industrijske proizvodnje formiran je na osnovu podataka o količinama proizvoda i ponderacionog sistema. Podaci o količinama daju se prema Nomenklaturi proizvoda i sirovina. Za obračun indeksa fizičkog obima industrijske proizvodnje ponderi izražavaju prosječnu dodatu vrijednost po jedinici proizvoda.

Poslednji objavljeni podatak se smatra preliminarnim i postaje konačan, u definiranom roku, predviđenim Kalendarom objavljivanja statističkih podataka.

INDUSTRY

Sources of data

The shown data are collected by monthly surveys through the questionnaire.

Coverage

Industrial survey includes enterprises, as well as their parts, performing the industrial activity, i.e., those that are according to the Classification of Activities (NACE Rev.2) classified into the following sectors: Mining and quarrying, Manufacturing, Electricity, gas, steam and air conditioning supply. Enterprises of non-industrial activities represent reporting units if they have in their structure a unit dealing with industrial production.

Definitions

Total turnover - refers to the income from the sale of goods and services minus returns and discounts, subsidies and VAT. The value is expressed in thousands of EUR.

Finished production is presented the amount of product that they have reached an appropriate level of treatment, so that the code and the name of the product is defined by the current most important products. The term product is used both for products that have a physical dimension, and industrial services. The product is finished when its correctness checking product quality control. Defective products are not considered as finished products.

The production is presented according to the Nomenclature of industrial products, including industrial products and services structured according to the activities in which they were produced.

Index of scope of industrial production is formed on the basis of data on product quantities and weighting system. The data are provided according to the Nomenclature of products and raw materials. In the calculation of the index of physical scope of industrial production, the weights express the average value added per product unit.

The last published data are considered preliminary, and becomes final within the defined deadline, as foreseen by the Statistical Release Calendar.

GRAĐEVINARSTVO

Izvor podataka

Prikazani podaci prikupljaju se upitnikom o građevinskoj aktivnosti kojim su obuhvaćena privredna društva koja su prema Klasifikaciji djelatnosti (KD 2010) registrovana u sektor F - Građevinarstvo i djelovi privrednih društava (KAU jedinice) koje izvore građevinske radove.

OBUHVAT

Istraživanjem o građevinskoj aktivnosti su obuhvaćena privredna društva sa 5 i više zaposlenih koja su bave građevinarstvom i djelovi privrednih društava (KAU) koje izvode građevinske radove. Istraživanje se radi na bazi uzorka u koji su uključena sva velika i srednja preduzeća, dok su mala preduzeća izabrana metodom stratifikovanog slučajnog uzorka.

DEFinicije

Vrijednost izvršenih građevinskih radova izražena je u tekućim cijenama i obuhvata ugrađeni građevinski materijal i utrošeni rad bez obzira na to da li su taj rad i materijal plaćeni ili ne. Podaci o vrijednosti izvršenih građevinskih radova prikazuju se na osnovu privremenih obračunskih situacija koje ispostavljaju izvođači radova.

Izvršeni efektivni časovi rada - obuhvataju stvarno odrađene časove radnika angažovanih na gradilištima u redovnom radnom vremenu kao i u prekovremenim satima.

Novi ugovori – predstavljaju ukupnu vrijednost ugovorenih radova između proizvođača i treće strane na osnovu zaključenog ugovora.

Posljednji objavljeni podatak se smatra preliminarnim i postaje konačan, u definitnom roku, predviđenim Kalendarom objavljivanja statističkih podataka.

CONSTRUCTION

Source of data

Presented data are collected by survey on construction activity, which include enterprise registered in Sector F – Construction, according to Classification NACE Rev.2, and enterprise (KAU) whose local units perform the construction works.

Coverage

Survey on construction activities covers enterprises with 5 and more employees who are involved in construction, as well as enterprises (KAU) whose business units engaged in construction works. Survey is based on sample which included all large and medium sized enterprises, while small enterprises are selected by stratified random sample.

Definitions

Value of finalized construction works is given at current prices and includes all built material and performed work spent regardless of whether such work and materials are paid or not. Data about the value of finalized construction works is given on the basis on provisional accounting situations given by contractors. The value does not include costs of buying the land, engineering, monitoring and VAT. The data on value of finalized work refer to works performed in the reporting period on finished and non-finished construction sites.

Effective working hours – include really performed working hours of workers engaged in the regular working hours, as well as overtime work.

New orders – present the total value of contracted works between producer and third party based on the concluded contract.

The last published data are considered preliminary, and becomes final within the defined deadline, as foreseen by the Statistical Release Calendar.

SPOJNA TRGOVINA

Izvori i metodi prikupljanja podataka
Izvor podataka za statistiku spoljne trgovine je Jedinstvena Carinska Isprava o izvozu i uvozu robe, koju prilikom carinjenja robe, u ime preduzeća, podnose carinskimčama špiederska preduzeća koje imaju dispoziciju carinskog obveznika.

Obuhvat
Pri izvozu obuhvata se sva roba koja potiče iz domaća odnosno proizvodnje iz unutrašnjeg robnog prometa uključujući i izvoz, nacionalizovana robu (roba koja je bila uvezena i oscarinjena, pa se u nepromijenjenom ili dorađenom stanju izvozi kao roba porijekla iz Crne Gore na strano tržište).

Uvoz obuhvata svu robu uvezenu iz inostranstva koja je oscarinjena i puštena u unutrašnji promet u cilju reprodukcije, investicija ili široke potrošnje. Uključene su i isporuke raznih dobrovolskih organizacija i privatne poklon pošiljke.

Od januara 2008. godine MONSTAT je u skladu sa preporukama UN-a i EUROSTAT-a primijenio opšti i specijalni trgovinski sistem. MONSTAT je do sada koristio ublaženu definiciju specijalnog sistema trgovine. Svjesni ograničenja ublažene definicije specijalnog sistema trgovine, u rezultatu spojine trgovinske razmjene uključen je i ponovni izvoz robe iz carinskih skladišta i slobodnih carinskih zona koji se registruje po opštem sistemu trgovine.

Odšt sistem trgovine koristi se u slučajevima kada se statistička teritorija zemlje poklapa sa njenom ekonomskom teritorijom. Prema tome, opšti sistem trgovine predstavlja širi koncept i kod uvoza obuhvata svu robu koja ulazi na ekonomsku teritoriju zemlje koja prikuplja podatke, sa izuzetkom robe koja je u tranzitu, a kod izvoza obuhvata svu robu koja napušta ekonomsku teritoriju zemlje koja prikuplja podatke, sa izuzetkom robe koja je u tranzitu.

Sistem specijalne trgovine predstavlja uži koncept i koristi se u slučajevima kada se statistička teritorija zemlje poklapa samo sa određenim dijelom njene ekonomске teritorije. Srta definicija specijalnog sistem trgovine koristi se kada statistička teritorija obuhvata samo slobodno cirkulirajuće područje u okviru koga roba može biti raspoloživa bez carinskih ograničenja, što znači da je ona prošla carinskih ograničenja, što znači da je ona prošla. Roba koja je prošla carinskih ograničenja, što znači da je ona prošla.

Izvoz obuhvata svu robu koja napušta slobodno cirkulirajuće područje zemlje koja prikuplja podatke.

Definicije
Vrijednost robe u spoljnoj trgovini iskazana je na osnovu cijena koje su postigli preduzeća prilikom sklapanja ugovora. Sve vrijednosti obračunate su na bazi sinteta franko granice Crne Gore: FOB-cijene za izvoz, CIF-cijene za uvoz.

Statistička vrijednost robe koja se izvozi jeste faktума vrijednost robe. Statistička vrijednost robe koja se izvozi jeste vrijednost koja predstavlja carinsku osnovicu. Podaci o vrijednosti su obračunati po tekućim kursima koji se primijenjuju za utvrđivanje carinske osnovice. Po tekućim kursima koji se primijenjuju za utvrđivanje carinske osnovice takođe je izvršen obračun troškova transporta, osiguranja, prevoza i sl, koji se plaćaju u stranoj valuti. Registracija podataka spoljne trgovine po zemljama vrši se po principu zemlje namjene kod izvoza i zemlje porijekla kod uvoza. To znači da se pri izvozu registruje zemlja u kojoj se roba troši i dalje prerađuje, a pri uvozu ona zemlja u kojoj je roba proizvodnjem dovedena u stanje u kome se uvozi.

EXTERNAL TRADE

Sources and methods of data collection
Data source for external trade statistics is Single Administrative Document on import and export of goods, submitted, on behalf of enterprises, by shipping agents having the disposition of Custom tributary.

Coverage
Export covers all goods of domestic i.e., internal production origin, including so-called nationalized merchandise, (imported goods cleared through the customs, and unchanged exported as goods of Montenegro origin).

Import covers all merchandise imported, cleared through the customs, and put on domestic market for reproduction, investment or consumption purposes. Deliveries of various charity organizations and private gifts are also included.

Due to the recommendations of UN and EUROSTAT, MONSTAT has since January 2008 applied the general and special trade systems.

So far MONSTAT was using the reduced definition of the special trade system. Being aware of the limitations of the reduced definition of special trade system, the results of external trade include the re-export of goods from customs warehouses and free customs zones which is registered according to general trade system.

General trade system is used in cases when the statistical territory matches with its economic territory. Accordingly, the general trade system presents the wider concept and in import it includes all goods coming in the economic territory of the country which collects data, with the exception of goods in transit, and in export it includes all goods leaving the economic territory of the country which collects data, with the exception of goods in transit.

Special trade system presents the narrow concept and is used in cases when the statistical territory of the country matches only with the certain part of its economic territory. The strict definition of the special trade system is used when the statistical territory includes only the free circulating area in which the goods can be available without the customs limitations, which means that it went through the customs procedure and that it is used for domestic use for the purpose of reproduction, wider consumption and investments.

The export includes all goods which leaves the free circulating area of the country which collects the data.

Definitions
Value of goods in external trade statistics is shown on the basis of prices fixed by organizations and enterprises by contractual stipulation. All values have been calculated on the basis of parity free on Montenegrin border, i.e. F.O.B. export prices and C.I.F. import prices.

Statistical value of goods being exported is the value representing customs base. Data on values are calculated on the basis of exchange rates applied for establishing customs base. Costs of transport, insurance and reloading, etc, paid in foreign currency are calculated at current exchange rates applied for establishing customs base. Registration of external trade data by country is carried out according to principle of destination country for the export and origin country for the import. It means that, in case of export, the country in which goods are consumed or further processed is registered, and in case of import – the country where the goods have been produced in the condition in which they have been imported.

Izvori podataka i obuhvatnost
Od januara 2017. godine Uprava za statistiku Crne Gore shodno Zakonu o zvaničnoj statistici i sistemu zvanične statistike ("Sl. List CG, br. 18/12") i prema Godišnjem planu zvanične statistike za 2017. godinu ("Sl. List CG, br. 6/17") sprovodi istraživanje o dolascima i noćenjima turista u ugoditeljskim objektima u kolektivnom smještaju, na mješovitoj nivou. Kolektivni smještajni objekti uključuju hoteline, pensione, motele, turistička naselja, odmarališta, hostele, kampove i ostale objekte kolektivnog smještaja. Kolektivni smještaj ne uključuje privatni smještaj (smještaj u kućama i sobama za iznajmljivanje), kao i u turističkim apartmanima. Od marta 2020. godine, više podaci i indeksi u tabelama preračunati su u skladu sa metodologijom istraživanja o dolascima i noćenjima turista u kolektivnom smještaju. Podaci od broja dolazaka turista i noćenja koji su prikupljeni su redovnim mjesečnim izvještajem (obrazac TU-11). Izvještaji se sastavljaju na osnovi evidencija u knjigama gostiju.

Izvještajne jedinice su privredna društva, pravna lica ili preduzetnici koji obavljaju djelatnost pružanja ugoditeljskih usluga za smještaj turista u kolektivnom smještaju. Smještajni objekti koji se razvrstavaju prema Pravilniku o vrstama, minimalno-tehničkim uslovima i kategorizaciji ugoditeljskih objekata ("Službeni list CG", br. 63/11, br.47/12) jesu: hotel & resort, wild beauty resort, grupa hoteli (hotel, mali hotel, boutique hotel, hotel garni, aparthotel, conhotel, hotel, pension i motel), turističko naselje, etno selo, eko lodge, vila, planinarski dom, odmaralište, kamp i slično. Osim ovih ugoditeljskih objekata regulisanih Pravilnikom obuhvataju se lječilišta i nekategorisani objekti.

Definicije

Turist je svaka osoba koja u mjestu van svog prebivališta provede najmanje jednu noć u ugoditeljskom ili drugom objektu za smještaj turista radi odmora ili rekreacije, zdravlja, studija, sportskih, religijskih, porodice, poslovanja, javnih misija ili skupova. U turiste se ne uključuju migranti pogranični radnici, diplomati, članovi vojnih snaga na redovnim zadacima, izbjeglice, itd. Turist je registrovan u svakom mjestu ili objektu u kojem boravi i zbog toga, u slučaju promjene mjesta ili objekta, dolazi do njegova ponovnog iskazivanja, a time i do dvostrukosti u podacima. Prema tome, statistika evidentira broj dolazaka turista, a ne broj turista.

Ministarstvo zdravlja, 15.marta 2020. godine, donijelo je, na predlog Instituta za javno zdravlje Crne Gore, a na osnovu Zakona o zaštitni stanovništva od zaraznih bolesti, Naredbom za preduzimanje privremenih mjera za sprečavanje unošenja u zemlju, susjedstvarje i sprečavanje prenošenja novog koronavirusa (COVID-19), koja se odnosi na zabranu pružanja ugoditeljskih usluga u hotelima, osobim za prijavljene goste.

Nacionalno koordinaciono tijelo za zarazne bolesti saglasilo se u više navrata o produženju gore navedene mjere koja je važila do 18.maja 2020. godine.

Prema Regulativi 692/2011 o evropskoj statistici turizma karantinski smještaj nije uključen u obuhvat istraživanja.

TOURISM
Sources of data and coverage

Since January 2017, Statistical Office of Montenegro according to Law on Official Statistics and Official Statistical System ("Off. Gazette of Montenegro, no. 18/12") and according to the Annual Plan of Official Statistics for 2017 ("Off. Gazette of Montenegro, no. 6/17") conducts survey on arrivals and overnight stays of tourists in tourists collective accommodation establishments that aims to provide basic information about the scope of tourist traffic, on a monthly basis. Collective accommodation facilities include hotels, inns, motels, holiday villages, tourist resorts, hostels, camps and other collective accommodation facilities. Collective accommodation does not include private accommodation (accommodation in houses and rooms for rent, as well as in tourist apartments). Since March 2017, all data and indexes in the tables are calculated according to the methodology on survey about tourist arrivals and overnight stays in collective accommodation. Data about tourist arrivals and overnight stays in collective accommodation are collected through regular monthly survey (form TU-11). The reports are compiled on the basis of records in the guest books.

Reporting units are business organizations, legal persons and entrepreneurs who are engaged in providing accommodation services to tourists in collective establishments. Accommodation establishments, classified according to the Regulations on the types, minimum technical requirements and categorization of objects ("Official Gazette of Montenegro", no. 63/11, No.47 / 12), are: hotel & resort, wild beauty resort, a group hotels (hotel, small hotel, boutique hotel, garni hotel, aperthotel, conhotel, hotel, guest house and motel), a tourist resort, etno village, eco lodge, villas, inns, mountain lodge, resort camp, and similar. In addition to these, survey also covers spas and uncategorized facilities.

Definitions

Tourist is a person who spends at least one night in an accommodation facility or some other object for accommodation of tourists, in a place other than his/her place of permanent residence for the reason of vacation or recreation, health, studies, sports, religion, family, business, public missions or meetings. Tourists do not include migrants, border workers, diplomats, members of military force in the regular duty, refugees, etc. Tourist is registered in a place or object where it resides and due to it, in the case of change of place or object, the double reporting may appear, which may lead to the double data. There the statistics records the arrivals of tourists, adn not the number of tourists.

On March 15, 2020, The Ministry of Health, at the proposal of the Institute of Public Health of Montenegro and based on the Law on Protection of the Population from Infectious Diseases, issued an order to take temporary measures to prevent the introduction of new coronavirus (COVID-19), which refers to the ban on the provision of catering services in hotels, except for registered guests.

The National Coordination Body for infectious diseases has agreed on several occasions to extend the above measure which was valid until 18 May 2020.

According to Regulation 692/2011 on European Tourism Statistics quarantine accommodation is not included in the scope of the survey.

Izvor podataka i obuhvatnost

Sva istraživanja saobraćaja osim istraživanja o teretnom drugom saobraćaju obuhvataju preduzeća sa 5 i više zaposlenih koja su u statističkom biznis registru razvrstana u sektor H Klasifikacije djelatnosti (KD 2010), oblasti 49, 50, 51, 52, 53 i sektor J - oblast 61.

Istraživanje o teretnom drugom saobraćaju se sprovodi na uzorku. Okvir za izbor uzorka je evidencija registrovanih vozila koja se dobija od Ministarstva unutrašnjih poslova Crne Gore.

Izvor podataka za:

(i) željeznički saobraćaj su izvještajne jedinice kojima je prevoz putnika i robe u željezničkom saobraćaju pretežna djelatnost (sektor H, oblast 49);
(ii) drumski putnički saobraćaj su izvještajne jedinice kojima je prevoz putnika u drumskom saobraćaju pretežna djelatnost (sektor H, oblast 49);
(iii) istraživanje teretnog drugog saobraćaja teretna vozila za prevoz robe korisne nosivosti 3500 kg i veće, kao i tegljači. Izvor podataka su pravna i fizička lica koja su vlasnici ili korisnici vozila. Izvor podataka za teretna dramska vozila je Ministarstvo unutrašnjih poslova Crne Gore.

THE BALANCE OF PAYMENT OF MONTENEGRO

The balance of payments is prepared according to the methodology prescribed by the International Monetary Fund (Balance of Payment, 1993). The sources of data are: MONSTAT, commercial banks, and the Central Bank of Montenegro.

The balance of payments is presented in EUR. Recalculation of the transaction values from the original currency to the reporting currency is performed by: using the mean exchange rate from the Central Bank of Montenegro and at the end of the period with evaluation transactions whose change is monitored using daily mean exchange rate.

The revision of data referring to 2004 was done in the beginning of 2005. Namely, it was technically possible in 2004 to follow transaction of goods between Montenegro and Serbia on the basis of data from Customs Administration of Montenegro, i.e., the customs declaration. Until 2004 the source for viewing these currents was only data of banks about the achieved balance of payments with foreign countries, i.e., ITRS.

Since 2005, the source of data about external trade is MONSTAT. In 2008, accomplished revision data from external trade for 2007 with methodology which use MONSTAT, CBM makes adjustments of data received from MONSTAT in order to harmonize them with the IMF methodology (Balance of Payments Manual, Fifth edition, IMF, 1993).

The registering of transportation services uses banks’ data on performed international payment operations. Incomes from travelling include estimated incomes from tourism, which are supplemented by data on provided health-recreation services and expenditures for education. Data on expenditures in tourism are obtained on the basis of the number of tourist overnight stays (data from MONSTAT) and estimated average daily consumption. The model for estimation of incomes from tourism was modified in the beginning of 2006, and the correction refers to 2003 and 2004. Data on expenditures in tourism are obtained on the basis of international payment operations.

Financial services (insurance and reinsurance, representative and mediation commission fees, and commission fees and expenses for banking operations) are covered on the basis of foreign payment operations statistics. Other services include investment work in foreign countries, PTT and communication services, forwarding services, expenses for the maintenance of representative offices, computer and information technology services, author’s fee, and fee for license issuance, as well as other business services. The data is obtained from foreign payment operations statistics and banks’ reports.

Income statement comprises data from foreign payment operations statistics on compensations to employees, payments, and charged dividends, The source of data is banks’ reports. Current transfers include data about transfers of Government sector and other sectors received from balance of payment with foreign countries. Direct and portfolio investments are followed on the basis of data of international payment operations statistics and conducted surveys. Other investments include data about loans, trade loans, cash and deposits and are obtained from the balance of payment statistics with foreign countries.

The Central Bank of Montenegro’s reserves comprise commercial banks’ fund deposited in international bank and the CBM funds deposited in foreign banks, funds in the CBM treasury and reserve positions in IMF. The source of data is CBM (monetary statistics).

Deposits by households – the table present the balance of total deposits of individuals by households at the end of period and their structure by time.
