- no occurrence

METHODOLOGICAL EXPLANATIONS

The presented data are collected through survey on price of dwelling in a new residential building (GRADJ-41). The survey is realised on reporting method and include sold dwellings in a new residential building, i.e. dwellings for which a contract of sale has been concluded between investor and buyer (for the first time sold dwelling).

For the purpose of appropriate access to the data use, there should be noted that the published prices (prices per 1 m²) are average prices, therefore, they are the result of different characteristics of construction and differences in the month in which the contract sale was concluded in one territory (of region and Montenegro).

All prices represent the nominal expression of value from sale contract (without revalorization), and they are expressed per 1m² of useful (residential) area.

The average price of dwellings in a new residential building includes dwellings sold by enterprises, as well as dwellings sold by solidarity housing development institution.

The average prices of dwellings in a new residential building significantly depend on the involvement of solidarity housing development dwellings. If the share of these dwellings increased, the average price of dwellings in a new residential building will be significantly lower, or if this share decreased, the average price will be higher.

The average market price of dwellings in a new residential building includes dwellings sold by enterprises, but not including dwellings sold by solidarity housing development institution.

The total price of dwelling covers price of constructing arranging the construction land, price of construction works and other costs.

The price of arranging construction land includes the following elements: land acquisition, demolition, preparation detailed urban plans and projects, the field testing, repair works, arrangement of terrain around the building, communal equipping of land.

Price of construction works includes all construction works and profits of investors per 1 m² of floor space, craft-finishing and installation works on buildings and dwellings.

Other costs include all construction costs such as contributions and taxes for connections to the electricity grid and other communal facilities, taxes for obtaining building permits, VAT, the cost of projecting the building, the interest on the loans and advances and etc.

Data are published according [Statistical Release Calendar](#).

According to the Revision policy of the Statistical Office, the final data shall be published with the date defined by the Statistical Release Calendar.
