## METHODOLOGICAL NOTES

These releases present the data collected through survey on construction works.

Survey on construction works are realised on a sample basis. The frame for a sample is enterprises with 5 and more employees who are in a statistical business register according to the Classification of activities classified in sector F – Construction, as well as companies (KAU), whose business units engaged in construction works. Survey covers all large and medium enterprises (class 2 and 3), while small enterprises (class 1) is selected by random simple sample.

Data on buildings constructed by individual owners are the result of an estimation method.

Value of finalised construction works covers all used building material and workloads whether they are paid or not. Data on value of construction works done relate to works performed during reference year on finished and unfinished constructions.

Dwelling is any residential construction unit intended for habitation, consisting of one or more rooms with necessary auxiliary spaces (such as: kitchen, bathroom, lobby, pantry, toilet, etc.) or without auxiliary spaces and with one or more separate entries.

Floor area is useful floor area of dwelling, measured by the inner walls of dwelling.

Data are published according to the [Statistical Release Calendar](#).

According to the Revision Policy of the Statistical Office, the final data shall be published with the date defined by the Statistical Release Calendar.

When using the data, state:

"Data source: Statistical Office - MONSTAT"

*More data, as well as detailed methodological notes can be found in the section: [Construction work](#)*
