For: **Mariana Kotzeva, Eurostat, Director General**

**Subject: Population Census in Montenegro**

Respected Ms. Kotzeva,

In the light of the latest expectations from general public in Montenegro, we are writing you again with the purpose of reopening topic of having monitoring of Population Census in Montenegro in November this year.

As you already know, Statistical Office of Montenegro envisaged the need for having monitoring of Population Census, early this year, and we have received negative reply from Eurostat.

We have done all that is under the mandate of Statistical Office of Montenegro, but as expected, this process has different angles out of our control.

Beside the preparation activities, we want to achieve highest possible level of confidence, and therefore we think that monitoring of the process by EU officials is very much needed due to the current state in our society which we are sure you are closely following.

We hope you will understand our request as necessary initiative, and reconsider the request, having in mind that Population Census in Montenegro is important part of our activities in the European integration process.

With respect,

**DIRECTOR**

*Miroslav Pejovic*
