**Graph 2. Share in total number and production value of covered foreign-owned business entities, by country**

*Observed by countries, the largest share of production value covered by business entities in the total production value is generated by Italy 36%, while its share in the total number of covered business entities amounted to 4%. On the other hand, with 26% of foreign-owned business entities covered, Serbia achieved 9% of production value in the total generated production value of foreign-owned business entities.*

**Graph 3. Sectors with the largest share in total number and production value of covered foreign-owned business entities**

## METHODOLOGICAL NOTES

Data on the activities of foreign affiliates are collected by the Annual Report on Inward Foreign Affiliates Statistics (iFATS).

The survey on Inward Foreign Affiliates Statistics - IFATS, is in accordance with the prescribed methodology based on the EU Regulation No 716/2007 (Regulation EC No 716/2007 of the European Parliament and Council on Community statistics on the structure and activity of foreign affiliates).

The framework used for inward foreign affiliates statistics (IFATS) is a registry of surveys on foreign direct investments obtained from the Central Bank of Montenegro.

This survey covers Sectors B-J, L-N of the KD2010 Activity Classification, which is in accordance with the Nace Rev.2 activity classification.

### Definitions

Number of business entities refers to businesses resident in the reporting country (Montenegro) and under supervision of foreign business entities (legal entities and / or natural persons) and have been active for at least a part of the reporting period.

Turnover includes calculated income from sale of products, goods and services by the reporting unit to third parties during the reference period, excluding VAT.

Production value is defined as the market value of all goods and services produced.

Intermediate consumption at purchase prices is the value of products and services that are transformed, used or consumed in the production process.

Gross value added represents the difference between gross production value and intermediate value (intermediate) consumption.

### Confidentiality

Aggregated data for which there is a reason for confidentiality (due to a small number of units, dominance rules or secondary confidentiality) are not published, in accordance with the Law on Official Statistics and Official Statistical System (Official Gazette of Montenegro No 18/12).

The release has been changed in accordance with the Instructions for the preparation of publications, releases and other documents of the Statistical Office. The data has not been changed, ie the data are the same as in the previously published release.
