## METHODOLOGICAL NOTES

Annual survey IND-21 collects the following data on industrial production: quantities of stocks at the beginning of the year; production realized (within that there are presented the data on produced quantities, and separately for service produced quantities); quantity spent for further manufacture; quantity at the end of year; quantity; and value of product sale. A separate list monitors purchase, expenditures, stocks of energy, and fuel for operating and technological purposes.

The reporting method is applied – every reporting unit drafts a report in the form (questionnaire) IND-21. Reporting units submit the Annual Report on Industry for previous year to the responsible regional unit, not later than 20 April of current year. The data sources are bookkeeping, warehouse records, and other records, and documentation available at the reporting unit.

From 2011, this survey was conducted according to current PRODCOM list, used as official nomenclature of industrial products.

Data are published according Data publishing calendar on our website [www.monstat.org](http://www.monstat.org)
