### METHODOLOGICAL EXPLANATIONS

The value of minimal consumer basket is the sum of expenditures for food and other expenditures covering bought products, own production, and gifts for an average household consisting of four members, two adults and two children.

When defining minimal expenditures for food and non-alcoholic beverage, the necessary quantity of minimal calories is 2.211 calories per day per inhabitant, based on the best practice of nutritionist.

The value of minimal consumer basket covers: expenditures for minimum of necessary food and non-alcoholic beverages (comprising 130 food products); expenditures for minimum necessary non food products and services and value of imputed rent.

For calculating the value of minimal food and non-alcoholic beverage basket of 130 products, an average price in current months is used, multiplied with monthly quantity in kg for four-member household. For calculating the value of non-food products and services and imputed rent basket, indices of consumer prices (CPI) are used. Imputed rent is an estimated value of rent for household living in its own dwelling.
