EXPLANATION

Legal basis for the adoption of the Annual Plan of Official Statistics is contained in Article 23 and Article 24 of the Law on Official Statistics and Official Statistical System (Official Gazette of Montenegro No 18/12), that defines that the Annual Plan of Official Statistics, upon previously opinion of the Council of Statistical System, is adopted by the Government of Montenegro. The Annual Plan of Official Statistics is derived from the Programme of Official Statistics as a short-term document, with further details on statistical activities for a relevant year.

Annual Plan of Official Statistics for 2017 envisages the implementation of 219 statistical activities. Of the total number of planned statistical activities, 166 (or 76%) will be done by Statistical Office, as the main coordinator and disseminator of statistical data, while 53 (or 24%) planned activities will be done by other official statistical producers.

A summary of key changes in the Annual Plan of Official Statistics for 2017 compared with the Annual Plan of Official Statistics for 2016 is the following:

- 1. New statistical activities** (10) introduced for the purposes of harmonization of the official statistics of Montenegro with the *acquis communautaire* for the statistics. Under competence of Statistical Office there are 7 new statistical activities out of total number of new statistical activities planned according to the Annual Plan of Official Statistics for 2017, while there are 3 activities under competence of other official statistical producers (Ministry of Science (1) and Institute for Public Health (2));
- 2. Terminating statistical activities** (2) Report on activities of incubator stationaries (competence of Statistical Office) and Survey on changes in accounts abroad (competence of Central Bank of Montenegro);
- 3. Introduction of pilot statistical activities** (24) that are introduced in cases when the assessment of methodology or quality of source of data to be collected by statistical survey is necessary to be done;
- 4. Change of dynamics in data publication** (8) is caused by the availability of source data as well as by both improvement of organization and control of statistical processes;
- 5. Redesigning** (3) of **statistical activities** caused by the use of administrative data source with the aim to reduce costs and overburden of reporting units as well as to obtain availability and more complete data coverage.

Financial resources planned for carrying out statistical surveys of Statistical Office for 2017 are 2.5 million of euro.
