### **METHODOLOGICAL NOTES**

#### **Data source**

The data on railway network are the result of regular annual surveys on reporting units, which is the maintenance of the railway infrastructure core business.

#### **Definitions**

**The railway** is intended solely for movement of train. Data on the length of railway lines are shown as building and as the really length.

**Building length** is measured from baseline to end point. Building length : open line and length of the main wicket-track in stations and other official places.

**The really length** of the line is the length of the open line and cellular transient gauge, and is measured from the middle to the middle station buildings or other official sites.
