## METHODOLOGICAL NOTES

### Data sources

The data on internal trade of enterprises engaged in the wholesale trade are collected by regular annual survey. The survey is based on the sample and covers enterprises classified in the wholesale trade (except for subgroups 50 00 and 50402) under the register of unit classification according to the activity classification.

### Coverage

Internal trade statistics covers and presents the turnover of enterprises with the wholesale trade as their main activity. This is a sample based survey which covers all large and medium-sized enterprises, while small and micro enterprises are set by using the random sample method.

### Definitions

The turnover in the wholesale trade is a value of goods delivered by companies/organizations engaged in the turnover: wholesale trade companies, other companies for further manufacturing, and large customers for their own consumption (health and social care organizations, education, defence, etc.).

The data on employment in the internal trade are presented based on the state at the end of the year, if the table otherwise indicates.
